Abbreviation: Gem, Gemcitabine; Cis, Cisplatin; GemCis, Gemcitabine and Cisplatin; Dur, Durvalumab; Pem, Pembrolizumab; Nab, Nab-paclitaxel; NUC-1031 is a phosphoramidate modification of gemcitabine. ^aHazard ratios (HRs) and 95% CIs for the pairwise comparisons of the network meta-analysis from indirect comparisons. Comparisons should be read from left to right. The HRs for comparisons are in the cell in common between the column-defining and row-defining treatment. For progression-free survival (PFS), an HR of less than 1 favors row-defining treatment.
